Part I Writing

参考范文：

I firmly believe that university canteens should indeed be open to the public.

This move not only enhances the utilization of campus resources but also contributes to community cohesion. University canteens, often renowned for their diverse and nutritional menus, could serve as an additional dining option for the local community, particularly those seeking healthy and affordable meals. Moreover, opening up canteens to the public could potentially generate additional revenue for the university, which could then be reinvested in improving facilities or supporting academic programs. Such an approach also fosters a sense of inclusivity, breaking down barriers between the university and the surrounding community. However, it is crucial to ensure that the flow of external visitors does not disrupt the daily lives of students and staff. Well-planned measures, such as designated visiting hours and appropriate seating arrangements, can help strike a balance.

In conclusion, opening university canteens to the public is a beneficial endeavor that can bring about positive changes for both the university and the wider community, provided that it is implemented with careful consideration and planning.

Part IV Translation

参考译文：

The Chinese character “fu”, signifying happiness and good luck, is one of the most commonly used auspicious symbols in traditional Chinese culture. People usually write a big character of fu on red paper, which means that they look forward to family happiness, social stability and national prosperity. Posting the character of fu during the Spring Festival is a long-standing folk custom. In order to celebrate the Spring Festival, every family will put the character of fu on the doors or walls to express the yearning for a happy life and the expectation for a better future. People sometimes put the character of fu upside down, indicating that happiness and good luck have arrived.
